**RUBISCO**  
 **SEEDS**  
Hybrid Canola

***ATOMIC TT** is a non-Genetically Modified spring canola hybrid. Triazine Tolerance, a naturally occurring trait, is a useful herbicide option offering an alternative Mode of Action to commonly used herbicides. Atomic has excellent early vigor, delivering superior yield potential and disease resistance in medium rainfall growing seasons.*

## KEY CHARACTERISTICS

Excellent spring vigor and rapid ground cover

- Good yield potential
- Short Height and Excellent Standability
- Short season, Early Maturity
- Moderate resistance to Blackleg
- Excellent shatter Tolerance
- Mid oleic oil profile
- High oil content and excellent test weight
- High germination and purity rate
- Developed by NPZ
