RUBISCO
**SEEDS**
Hybrid Canola

***PHOENIX CL** is a non-GM, two-gene Clearfield winter canola hybrid with excellent tolerance to post applied Beyond® herbicide . Phoenix CL shows consistent yield stability due to its fall growth vigor and its quick recovery during spring development. Phoenix CL is an early maturing hybrid with enhanced pod shattering resistance and an excellent disease resistance package.*

KEY CHARACTERISTICS

- Vigorous fall growth, strong deep tap root
- Superior yield potential for high yielding environments, higher rainfall areas /irrigation
- Early Maturity and Resistance to lodging
- Very High oil content
- High germination and purity rate
- Excellent Resistance to disease and pod shattering
- Two gene Clearfield hybrid, ideal for re-cropping following Clearfield Wheat or pulse crops
- Strong cross tolerance to Immy/SU herbicides
- Developed by
