***EDIMAX** is a medium-early maturity, high yielding winter canola hybrid. This hybrid has been developed to provide US farmers access to Clearfield technology in winter canola. Edimax has shown excellent tolerance to post-applied Beyond® herbicide. Released commercially in 2012.*

## **KEY CHARACTERISTICS**

- Vigorous fall growth
- High yield potential
- Excellent winter hardiness
- Medium-Early maturity
- Good standability
- Suitable for higher yielding sites
- Responsive to fungicides in humid environments
- Good blackleg resistance
- High germination and purity
- Excellent tolerance to soil residues of Immy type herbicides. Can be planted following Clearfield tolerant wheat
- Typical height 45" - 55"
- Relatively high vernalization requirement
- Large seed size
- Suitable for direct harvesting
- Developed by  **DL SEEDS**
