Hybrid Canola

CARLSSON CL is a non-GM, two-gene Clearfield winter canola hybrid with excellent tolerance to post applied Beyond® herbicide. Carlsson CL delivers stable yield performance especially on lighter, drier soils. Strong disease tolerance and enhanced pod shattering makes Carlsson CL a valuable hybrid in a grower's portfolio.

KEY CHARACTERISTICS

- Vigorous fall growth, deep tap root, strong winter hardiness
- Demonstrates yield performance advantages on lighter/drier soils
- Relatively tolerant of late season stress
- Medium Maturity. Resistance to lodging
- Very High oil content
- Excellent Resistance to disease (RLM7), Blackleg and Verticillium
- Enhanced tolerance to pod shattering
- Two gene Clearfield hybrid, ideal for re-cropping following Clearfield Wheat or pulse crops
- Strong cross tolerance to Immy/SU herbicides
- Developed by
